

Story 1: Monthly display of new releases

1. Acceptance Criteria (Key Requirements)

ID	Description	User Priority
BR1	In the application the month should display a small blurb of each shoe.	High
BR2	In the application the month should display an image of each show being released.	High
BR3	In the application each shoe should have a suggested price pricing displayed.	High

Story 2: Submit email for reminder

2. Acceptance Criteria (Key Requirements)

ID	Description	User Priority
BR1	In the application there should be an area to submit an email address.	High
BR2	In the application upon successful submission of a valid email address, the user should receive the message: "Thanks! We will notify you of our new shoes at this email: users email address."	High

Testing Assumptions for All Test Cases

1. Testing will be conducted on the following browser variants: Firefox v50, Chrome v58, IE 11, Safari v10
2. Testing will occur for Firefox, Chrome and IE on Windows PC and Safari testing will be on Mac OS X v10.
3. Mobile Testing: Safari testing on iOS iPhone 6s/iPad 2 Android Testing on Samsung GS7 edge.
4. All content/images will be verified based on a content inventory document.
5. A dedicated list is available in the backend such as a Marketo list or Google Doc to capture email addresses.

Test Case for Story 1: Monthly display of new releases

Test Case ID	REQ ID	Test Case Step	Description	Expected Result
TC1	BR1	1	Go to Application>Select Month (repeat for all 12 months)	Application shows shoes released for the selected month along with a corresponding blurb for each shoe.
	BR1	2	Verify formatting, spelling and content is correct for each blurb. Review Brand, Name, Description, and Release Month.	Each blurb within the month is correctly formatted and displayed with no spelling errors and matches the content guide/inventory for the correct Brand, Name, Description, and Release Month.
	BR2	3	Review image for each blurb.	Application shows the correct, properly formatted image for each shoe blurb based on the content inventory guide.
	BR3	4	Verify the price is displayed for each shoe blurb.	Each shoe blurb has a suggested price in the following format i.e. '\$1000.00'.

Test Case for Story 2: Submit email for reminder

Test Case ID	REQ ID	Test Case Step	Description	Expected Result
TC2	BR1	1	Go to Application>Select 'Remind me of new shoes' Email text box.	The application displays an area where email addresses can be input with the following: 'Remind me of new shoes', an email text box, and a 'Submit' button.
	BR2	2	Enter a valid email address in the Email text box and press enter or click submit. Format: blank@blank.(com/net/etc.) i.e. go@go.com	The application successfully transmits the user's email and shows a positive confirmation in a green box of 'Thanks! We will notify you of our new shoes at this email: (submitted email is displayed)'.
	BR2	3	Enter a previously submitted email into the Email text box and press enter or click submit. i.e. go@go.com	The application should prompt the user with the message: 'The following email: (user submitted email) has previously been added to our list. We will keep you posted on our new shoes.'
	BR2	4	Enter an invalid email without the proper format: blank@blank.(com/net/etc.) i.e. go@go. / @go.com	The application does not transmit the user's invalid email and displays the following message: 'Invalid email format. Ex. name@example.com'.
	BR1/2	5	Verify and review the email list with the sample test emails in the email capture list. i.e.(Marketo or Google Doc)	The email capture list displays all valid emails submitted without any duplicate or invalid emails.
